

# Wave Rider Experiences

Sal Salis guests have access to a beautiful 40 foot (21mtr) Black Watch 40—a vessel that is custom built in Australia for Australian conditions. Named **Wave Rider**, she combines safety with sea-going ability, comfortable interiors and a spacious back deck. Our experienced skipper Murray Pattison has been exploring, cruising and fishing the waters around the Ningaloo Reef for many years and his knowledge and passion for all things nautical and marine makes a day at sea all the more enjoyable!

## Whale Shark Swim Experiences:

From April to July hop in the water with the largest fish in the sea! Whale sharks grow to 12 mtrs in length and are gentle filter feeders. Ningaloo is one of the only places in the world whale sharks appear regularly in large numbers, and over 235 individuals have been recorded.

## Humpback Whale Swim Experiences:

NEW in 2016 you have the opportunity to swim with humpback whales as they migrate south along the Ningaloo Reef. Swims will take place in August, September and October

*For both above we offer share experiences at \$500 per person. Our small numbers ensure you have more time in the water giving us the time to enjoy a full day of adventure on the Indian Ocean. Charters include transfers from/to camp, lunch & snacks as well as all gear. Private charters are \$4500 per day.*

## Snorkel Charters

Murray knows some remarkable snorkelling spots behind the Reef and around the Murion Islands, 15 kms from North West Cape. *Private option only, full day charter from \$2200.*

## Free Diving:

Free diving relies on the divers' ability to hold their breath rather than on the use of a breathing apparatus. Nat (our videographer /photographer) has worked and training alongside some of the best free divers in the world, she has achieved personal best depths of 60 metres. A lesson with Nat is a remarkable marine experience. *Private option only, full day charter from \$2200. Can be combined with fishing or snorkelling.*

## Fishing For the Future:

Murray and the team practice 'fishing for the future' and the majority of fish are caught and released. Murray says 'I have a deep passion for the ocean & the wildlife in it. I want future children of mine, and my children's children to experience this amazing place. I want it to be better for them than it is right now.'

## Sports Fishing:

Ningaloo Reef is a great place for sports fishing and a good day out may produce a mixed bag of golden trevally, coral trout, rankin cod, red bass or mackerel.

## Billfish - on Fly, Light or Heavy Tackle

Murray believes in 'fair play' and catching billfish on fly is his particular specialty; but there is the option for light tackle and heavy tackle for the 'big game' addict. Species caught in these waters are blue, black and striped marlin and sailfish.

*Fishing trips are available on a private basis only, full day charter from \$2200. Extended live aboard trips are available.*
